Canadians delivering
choice and value to
Canada's Surgical
Community

" A better life through innovative
surgical technology "

"Bringing clinical quality, service and economic
value to the surgical stapling market in Canada."

INNOVATION TEAMWORK

Panther Medical Canada

History

Panther Medical Canada Inc is a welcome addition to the Canadian Healthcare Supplier Landscape and is an example of Canadians working to reshape healthcare by delivering missing quality, service and value.

By partnering with Panther Healthcare of China, the 3rd largest global manufacturer open & endoscopic stapler products, Panther Medical Canada will deliver significant value & savings to Canadian Healthcare.

Panther stapling products are CE Mark Approved, FDA Licensed and Health Canada Licensed, are being used in over 65 Countries WorldWide and are now available in Canadian ORs for clinical use and savings.

Formed in July 2018 by 2 successful Canadian Healthcare Entrepreneurs, Mario Cortis & David Goossens, Panther Medical Canada plans to partner with Canadian Hospitals, Surgeons, OR Teams and Economic Payers to supply high quality open & laparoscopic surgical stapling solutions, saving Canadian's money.

Over 2018 and beyond, Panther Medical Canada will deliver training, quality and service to Canadian Surgeons and OR Teams, while disrupting pricing inefficiencies in the Canadian Surgical Market.

Panther Medical Canada puts Canadians First.

OUR PURPOSE

Our products are designed and manufactured to better support the work of the surgeon in the operating room.

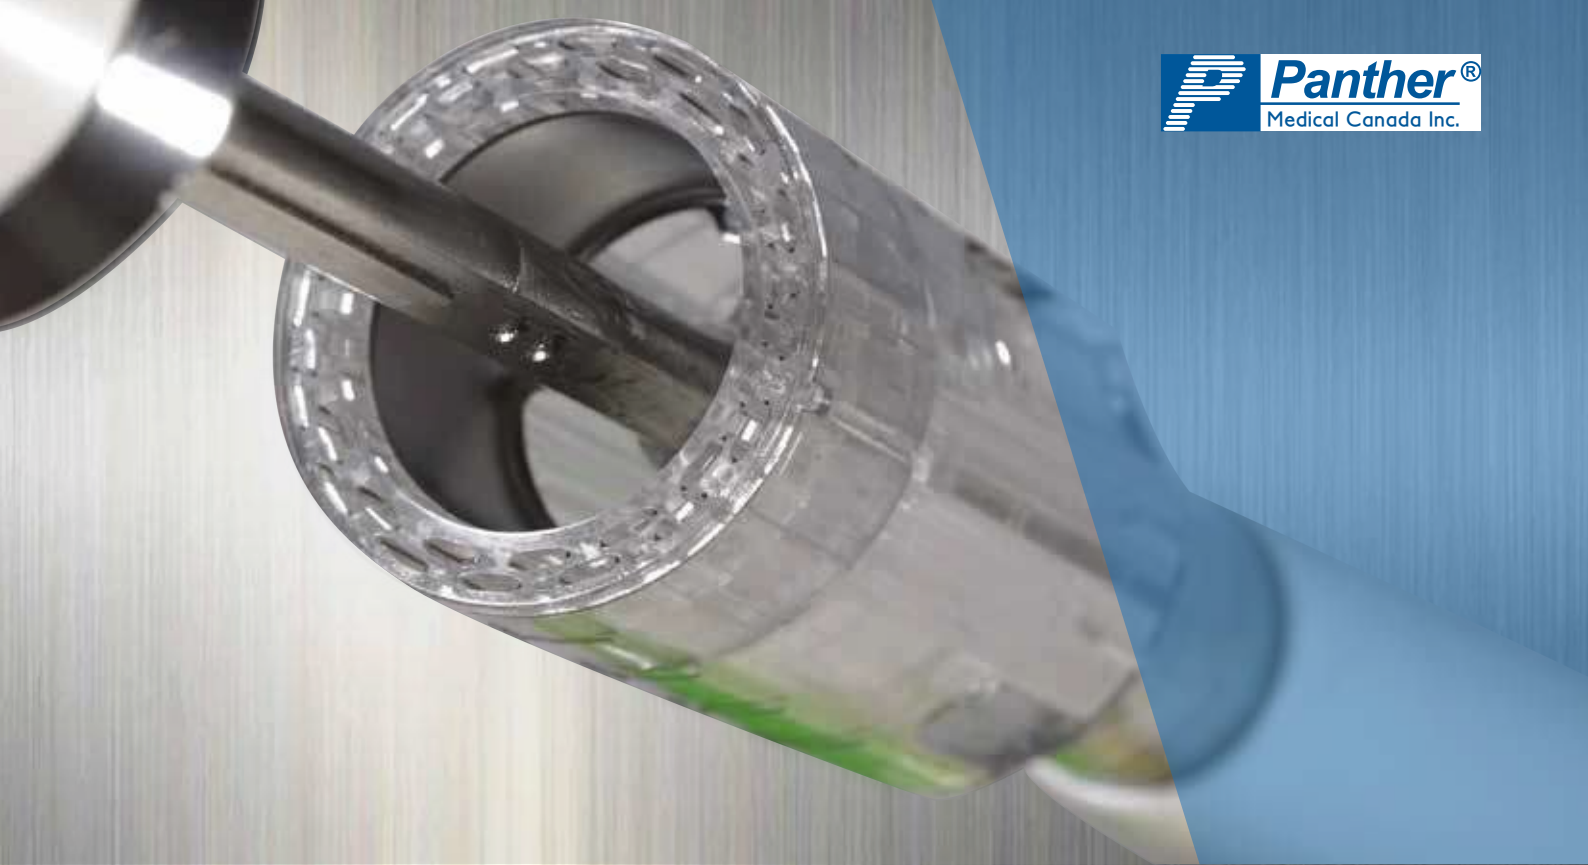

OUR VISION

Is continuous improvement of patients' health.

OUR MISSION

Is to provide innovative, cost-effective and reliable products which serve the needs of surgeons in their daily tasks of improving and saving patients' lives.

What We Do

Panther Medical Canada is focused on surgical stapling and minimally invasive surgery products. Our current portfolio of high quality open and endoscopic Surgical Staplers and laparoscopic accessories is serviced by a dedicated team of Clinical Product Specialists.

Test & Control

Testing, controls and tracking guarantees quality: every single stapler has to pass a firing test before being placed to the market. Moreover, every single stapler and cartridge is photographed and stored for QMS tracking, to ensure that every single staple has been correctly positioned. From Factory to the Surgeon's hands, Panther Medical Canada ensures product safety and quality in every surgical procedure.

Research, Development & Certification

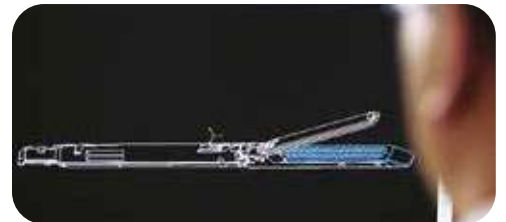

Panther Medical Canada works with Canadian Surgeons to input their perspectives to the R&D Department at Panther Healthcare.

Panther Medical Canada has a Canadian Medical Advisory Board (MAB) comprised of Canadian Surgeons that provide clinical and technical end-user input to Panther's product innovation process.

There are over 200 Globally Registered Intellectual Property Rights for the Panther stapling products and the growing Panther HealthCare R&D Team consists of more than 30 Biomedical Engineers.

Our Panther HealthCare R&D Team owns over 140 authorized patents, with another 103 patent applications under review.

The Panther HealthCare R&D Team has 4 major product focuses including endo staplers, linear and circular cutters and staplers. Coming soon to Canada are powered endo staplers and other innovations to help Canadian surgeons deliver better outcomes.

EC, ISO 2001, ISO 13485, ISO 11135 (ETO sterilization);
