

January 21, 2021

To Whom it May Concern,

These are exceedingly difficult times for all of us but especially all the front-line workers who have given so generously of their time over the past 11 months. Panther Medical Canada wants to thank you for your commitment and service now and always.

When Panther Healthcare expanded globally and into Canada in 2018, we offered our EndoMechanical stapling reloads in individual units to make it easier for hospitals and surgeons to trial our products.

This was well received at the beginning, but as our presence has grown in Canada and globally so to has the request for a “Greener “solution. The individual packaging and IFU’s create extra environmental waste, both to produce and recycle. Panther Healthcare has listened and is acting.

Panther Medical Canada will now be selling ALL Reloads in boxes of 6 or 3.

Endo Linear Cutter Reloads

- All codes beginning with **CADB or CADC = Box of 6 Reloads**

Open Linear Cutter Reloads

- All codes beginning with **SADB = Box of 6 Reloads**

Open Linear Stapler Reloads

- All codes beginning with **FLSLH = Box of 3 Reloads**

The timing of the transition will depend on our inventory and when we are depleted of the individual units. We expect the transition to take place in mid to late February.

As we enter our fourth year in Canada, we are excited and looking forward to the eventual end of this pandemic. As we all exit and return to the new normal, Panther Medical Canada will be here to support you and your needs.

When you are ready; we have put together a world class product offering at a price point that just may surprise you.

Until then, please stay safe and healthy.

Sincerely,

John Davis
President
Panther Medical Canada
